FEATURES

EMMA (Emergency Management Mobile Application) is the first-of-its-kind integrated software and mobile app ENS solution that empowers citizens to provide assistance in emergency situations before the arrival of first responders.

Features include:

Easy-to-use, multi-channel platform ENS.
Instantly reach any device across multiple channels including email, text, voice call, fax, mobile app push notifications, pagers, and more.

Real-time responses.
Send alerts with one click and manage responses in real-time from your smartphone. You can also receive critical feedback from recipients and provide communication updates based upon real-time, 2-way communication to establish urgency to those needing more help.

In-app GPS.
Target only employees affected by an event by outlining the location on a map. Select several areas at once with EMMA's geofencing capabilities.

Real-time reporting.
Improve your emergency plan with real-time reporting. Reporting capabilities allow you to track progress, history, usage and more.
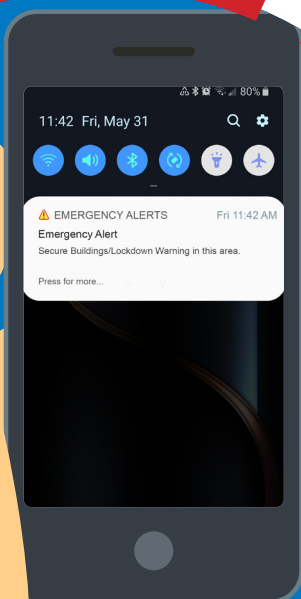

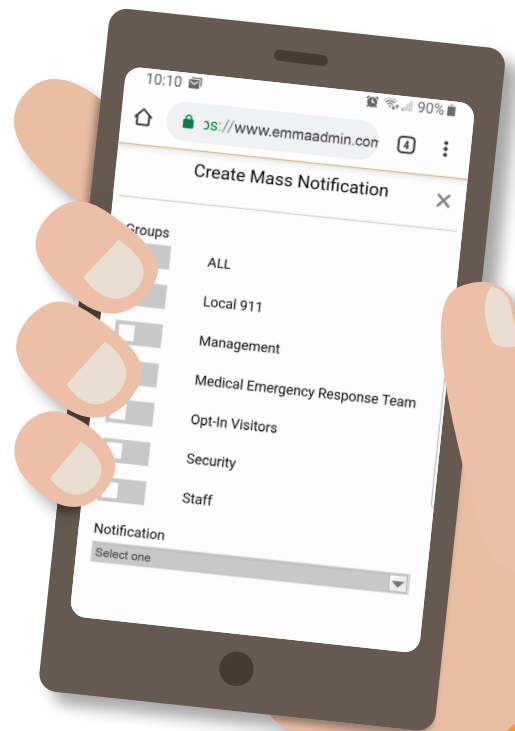

Customize your ENS.
Easily integrate your ENS with all EMMA features.

Reliable and affordable.
No hidden fees and no upfront costs. EMMA will beat any competitor's price.
